

Simply brilliant, our versatile lightweight, easy to splice and handle

DYNEEMA® BOWROPE

An immensely strong 12 strand synthetic winch rope made from Dyneema® SK78 High Modulus Polyethylene Fibre, manufactured to a very high exact specification set by David Bowyer of GOODWINCH LIMITED

Each of the twelve strands of **Dyneema® Bowrope** are made up from further strands containing thousands of very fine Dyneema® fibres. This creates an incredibly robust, strong and lightweight safer alternative to wire rope.

Dyneema® Bowrope is size for size the strongest and most durable synthetic winch rope available, **at a price you can afford.**

Dyneema® Bowrope is UV stabilised giving the rope a long, safe working life.

The special **Dyneema® Bowrope** highly visible light blue coating ensures both the

rope's stability and abrasion resistance. After manufacturing the 12 strand rope, it is heat set under tension to ensure durability, uniformity and maximum strength.

Another reason to use **Dyneema® Bowrope** is that it stretches very little, even under full load, so if in the unlikely event it did break, it won't flail like a wire rope breaking. A very important safety feature.

Dyneema® Bowrope also has excellent bending, bending fatigue properties and is therefore ideally suited for most diameter winch drums and pulley blocks. It does not

curl up or kink like wire rope, nor do you get horrible spikes of wire sticking out.

Our **Dyneema® Bowrope** is also very durable due to its good resistance to both mechanical and environmental attack. It is not affected by oil or water and is just as strong, whether used in dry, wet, cold or humid conditions.

During the last 10 years or so, Goodwinch has supplied over 265km of blue **Dyneema® Bowrope** - well over 9,000 made up ropes.

*** Free DVD showing Off-Road Driving and Winching Techniques with Care & Use of Dyneema® Bowrope with every rope ***
Dyneema® Bowrope is available in several sizes and lengths for off-road winches and commercial winches fitted to Recovery Vehicles.

Dyneema® Bowrope is available from our massive stocks in 5, 6, 8, 10, 11, 12 & 14mm. 5 & 6mm are used on small winches up to 5,000 lbs, 8mm for 6,000 lb winches and 10mm for 8 or 9,000 lbs models. But our best sellers are most definitely 10 & 11mm used in various winch rope lengths for winches between 9,000 and 12,500 lbs capacity. The 12mm & 14mm sizes are for our commercial mechanical, hydraulic and 16,500 lb winches. All these sizes weigh only about 15% of a similar sized wire rope. Just think of the weight you will save on the front of your vehicle. A saving of between 10 and 20 kgs!

Any length of rigged made up rope can be supplied, but in this field, our **BEST PRICES** for our popular sizes are:

Ready made up ropes with tubed thimble and red safety hook (add £5 for the larger yellow grade 80 safety hook). Also anti-wear sleeving £2.50/m	Breaking Strength for Spliced rope	Dia Kgs	10mm	11mm	12mm	14mm
75' (23m) often used on Recovery Trucks			£139	£146	£170	£229
100' (30.5m) most off-road winches			£179	£189	£236	£299
125' (38m) large drum winches - Giggiepin GP82, 83 & 84 & Warn 8274			£219	£234	£285	£389
150' (46m) large mechanical & hydraulic winches			£259	£279	£339	£449
90' (27.5m) Extension rope fitted with 2 thimbles and one hook .			£166	£178	£215	£285

When replacing wire rope, we recommend you use the next size up **Dyneema® Bowrope** to allow for normal wear and tear. Trade and Export enquiries welcome from bona fide 4x4 Dealers both in the UK and throughout the world.

Why not use our aluminium hawse at £39. If purchasing a TDS from us with **Dyneema® Bowrope**, you may have one of these instead of roller fairleads for just £25.
